

UAE Foundation. Control and protection — without losing ownership.

A legal structure for asset protection, succession planning, and confidential management. A trust alternative for HNWI clients.

What is a Foundation

CONTEXT

A foundation in the UAE is a legal entity that holds assets on behalf of beneficiaries. Unlike a trust, the founder retains control. Used for: asset protection from claims, succession planning, real estate and investment management, confidential ownership structure.

What You Get

OUTCOME

Asset Protection

Assets belong to the foundation, not the individual. Protection from claims, lawsuits, creditors.

Founder Control

Unlike a trust, the founder stays in control. Beneficiaries and rules can be changed.

Succession Planning

Automatic asset transfer per foundation rules. No court, no Sharia, no delays.

Confidentiality

Ownership structure is not publicly disclosed. Foundation is a separate legal entity.

How It Works

PROCESS

01

Analysis

Asset and goal assessment.
Comparison: foundation vs direct ownership vs trust.

02

Architecture

Structure design: founder, beneficiaries, management rules, succession plan.

03

Registration

Constitutional documents preparation.
Registration in DIFC, ADGM, or RAK ICC.

04

Integration

Asset transfer to foundation. Bank accounts, custody, reporting setup.

What's Included

SCOPE

- ☒ Foundation applicability analysis
- ☒ Structure design
- ☒ Foundation registration
- ☒ Asset transfer
- ☒ Jurisdiction selection (DIFC / ADGM / RAK)
- ☒ Charter & rules preparation
- ☒ Council appointment
- ☒ Banking & custody integration

Why WTP

APPROACH

- **Beyond paperwork**
We design structure for real goals: protection, succession, confidentiality.
- **Banking link**
A foundation without an account is useless. We open accounts in parallel with registration.
- **Long-term support**
Reporting, rule updates, corporate governance — ongoing support.
