

2026-02-26-b2c-client-landing-design

Date: 2026-02-26 Status: Approved Author: Claude (brainstorming session with Konstantin)

1. Strategic Context

Why B2C Now

WTP2 has been 100% B2B partner-focused (6 partner landings live). Adding a direct B2C channel to:

- Capture end clients who search for UAE relocation independently (no partner referral)
- Create a flywheel: B2C clients without exit advisors get referred TO partners, strengthening B2B relationships
- Build direct brand awareness that also benefits partner channel

Relationship to B2B

This is NOT a pivot. B2B channel stays as-is. B2C is a parallel, additive channel.

B2B (EXISTING)	B2C (NEW)	
Audience	Tax advisors, lawyers, family offices	Business owners, HNWI directly
Message	"Safe execution partner for your clients"	"We orchestrate your complete relocation"
CTA	Partner Kit / Submit Case	Get Your Banking Roadmap
URL path	/partner/	/relocate/
CRM funnel	Existing B2B pipeline	New B2C pipeline (separate)
Language	Professional peer-to-peer	Expert-to-client, confident but accessible

2. Core Positioning

Category Shift

From: "UAE corporate services provider" (crowded, commodity) **To:** "Cross-border relocation orchestrator" (unique, zero direct competitors)

One-Liner

WTP orchestrates your complete relocation — coordinated exit from your home jurisdiction + bankable company setup in the UAE — through an international partner network.

Key Insight

Everyone sells the destination. Nobody coordinates the exit AND the entry. The client's real problem is two-sided:

1. **EXIT** from current jurisdiction (exit tax, capital gains, substance, wind-down)

2. **ENTRY** into UAE (company, banking, visa, tax residency, substance)

Most UAE providers only handle side 2. Home advisors only handle side 1. WTP bridges both.

Three-Layer Value

- 1. **For the client:** "I don't coordinate two advisors in two countries — WTP does it for me"
- 2. **For B2B partners:** "WTP sends me clients who need my exit services — it's a lead source"
- 3. **For the market:** New category with zero competition

3. Target Audience & Market Tiering

Market Tiers

Tier 1 — Active targeting (dedicated spoke pages + ads)

MARKET	TRIGGER	AVG. DEAL VALUE	BANKING DIFFICULTY
UK	Non-dom abolition (April 2025)	High (EUR 500K+ businesses)	Medium
Germany	Exit tax reform (7-year installment)	Very high	Medium
Netherlands	Box 3 reform 2026	High	Medium

Tier 2 — Catch on hub (universal page + FAQ)

MARKET	VOLUME	NOTE
India	22% of Dubai property, 3,500 millionaires/year	Mostly RE channel, not corporate advisory
Saudi/GCC	11% of property, easy banking	Less need for "help" — they know UAE
China/HK	14% of property, 7,800 net outflow	Language barrier; catch English-speaking HK professionals
Africa (Nigeria, SA)	Growing corridor	Banking-First adds most value here (high rejection rates)

Tier 3 — No active focus (stop-factors)

MARKET	REASON
Russia/CIS	Sanctions. 90% bank rejections. Reputational risk.
Iran	Banking impossible. Full stop-factor.
Pakistan	Enhanced due diligence, low avg. deal value

Personas (B2C)

PERSONA	PROFILE	CORE NEED	ENTRY POINT
The Restructurer	Business owner relocating operations to UAE	Working company + bank account	Hub → Banking-First
The Tax Emigrant	Individual exiting high-tax EU jurisdiction	Tax-correct exit + UAE residency	Spoke page (UK/DE/NL)
The Investor	HNWI investing in UAE property	Golden Visa + structure + tax planning	Hub → Investment card
The Rescue Case	Already has UAE company, bank rejected	Fix structure, re-apply to bank	Hub → FAQ / Compliance Rescue

4. Competitive Landscape

Jurisdiction Competition

UAE competes with Singapore, Portugal, Switzerland, Malta, Monaco. Key comparison:

UAE	SINGAPORE	PORTUGAL	SWITZERLAND	MALTA	
Corporate tax	9%	17%	21%	8.5-24%	35%/5%*
Setup time	2-4 weeks	1-3 weeks	4-8 weeks	4-12 weeks	8-16 weeks
Banking	Strict but manageable	Easy	Easy	Very strict	Moderate
Golden Visa	Yes (2M AED)	No	Yes (500K EUR)	No	Yes (700K EUR)
Substance need	Real	Real	Minimal	Real	Minimal

UAE wins on: tax rate, visa program, speed, lifestyle. Weakness: banking strictness — which is exactly what Banking-First solves.

Provider Competition

- Mass-market agents: sell registrations, no banking expertise
- Big Four: expensive, slow, not hands-on
- Grey operators: shortcuts, reputational risk
- Home-country advisors with UAE desks: generalist, no deep UAE banking knowledge

WTP's unique position: Only provider that coordinates exit + entry as one synchronized process through a partner network.

5. Messaging Framework

Story-Based Sales Narrative (from sales-consulting.md)

1. **Character:** Business owner / HNWI who needs to restructure internationally
2. **Problem:** Two-sided complexity — exiting home jurisdiction AND entering UAE — with nobody coordinating the bridge
3. **Failed attempts:** DIY coordination between local advisor and UAE agent; registered company but bank said no; paid for structure that has substance problems
4. **Solution:** WTP orchestrates both sides — partner firms handle exit, WTP handles Banking-First entry, synchronized timeline
5. **Proof:** Banking-First methodology, partner network map, risk verdict system, transparent Cost + Fee model
6. **Voice of customer:** "They told me what they DON'T do. That gave me confidence." / "The pre-check saved us from a bad case."

Psychological Map (per landing section)

SECTION	PSYCHOLOGY	MECHANISM
Hero	Loss aversion + Pattern interrupt	"Who handles the exit?" — names the gap nobody talks about
The Bridge	Authority + Unity	Partner network = infrastructure, not a solo operator
Banking-First	Commitment & Consistency	4 logical steps → "of course this is the right order"
Jurisdiction comparison	Anchoring + Contrast	UAE looks best when compared fairly with data
Who This Is For	Similarity bias	Problem cards, not country cards — everyone finds themselves
Social proof	Bandwagon + Authority	Multi-jurisdiction presence, partner logos

SECTION	PSYCHOLOGY	MECHANISM
FAQ	Regret aversion	Addresses "what if" fears before they become objections
Final CTA	Zero-price effect + Specificity	Free Banking Roadmap, 5-7 days, no commitment

6. Landing Page Architecture

Hub & Spoke Model

“

- /relocate (Hub – universal, all markets)
- └ /relocate/uk-non-dom (Spoke – UK non-dom trigger)
- └ /relocate/german-exit-tax (Spoke – German exit tax trigger)
- └ /relocate/dutch-box3 (Spoke – Netherlands Box 3 trigger)
- └ (future spokes as markets prove demand)

”

Hub Page Sections

6.1 Hero

Variant A (recommended):

Relocating to the UAE? We handle both sides.

Coordinated exit from your home jurisdiction + bankable company setup in the UAE. One process, one team, partner firms in key markets.

[Get Your Banking Roadmap]

Variant B (provocative):

Your UAE provider handles the UAE. Who handles the exit?

Exit tax, capital gains, substance rules, pension implications – the hard part isn't setting up in Dubai. It's leaving correctly. We coordinate both sides through our international partner network.

[Get Your Banking Roadmap]

Variant C (problem-first):

Your UAE Structure Won't Work Without a Bank Account.

Most providers register your company and hope for the best. We assess bankability first – before you spend a dirham on setup.

6.2 The Bridge (NEW – key differentiator section)

Visual: Map with dots in UK, DE, NL + lines to UAE.

Exit side – Partner firms in the UK, Germany, and the Netherlands handle tax exit, capital gains, regulatory compliance, and wind-down of local structures.

>

Entry side – WTP handles UAE company formation, banking, visa, tax residency, and substance – using our Banking-First methodology.

>

The bridge – We synchronize both sides into one timeline. Your exit advisor and our team work from a shared playbook, so nothing falls through the cracks.

>

Coming from another jurisdiction? We coordinate with your existing advisor using our standard cross-border protocol.

6.3 Who This Is For (problem cards, not country cards)

CARD	COPY	CATCHES
Restructuring	"Relocating your business to the UAE and need a structure that actually opens a bank account"	EU, UK, India, China – anyone
Tax Residency	"Need UAE tax residency that withstands scrutiny from your home country's tax authority"	EU (exit tax), UK (non-dom), global
Golden Visa + Investment	"Investing in UAE property and want visa, company structure, and tax planning handled as one"	India, GCC, China, global
Compliance Rescue	"Already have a UAE company but your bank rejected you – or your substance is questionable"	Everyone with existing problems

6.4 Banking-First Method (4 steps)

1. **Pre-Check** – Assess your profile, source of funds, and flag potential issues – both UAE-side (bank readiness) and exit-side (tax exposure, substance requirements)
2. **Exit Coordination** – Connect you with our partner firm in your jurisdiction (or coordinate with your existing advisor) to plan the tax-correct exit
3. **UAE Architecture** – Design the right structure based on your banking profile, business model, and residency goals
4. **Synchronized Execution** – Exit and entry happen in the right order. Registration, banking, visa, substance – timed to your tax calendar

6.5 Jurisdiction Comparison

Table: UAE vs Singapore vs Portugal vs Switzerland vs Malta

Framing: "If you're still deciding between UAE and other jurisdictions – here's how they compare."

Conclusion: "UAE wins on tax rate, visa program, and speed. But only if your banking is sorted. That's where we come in."

6.6 How We're Different (6 differentiators)

1. Banking-First process (pre-check before registration)
2. Exit + Entry coordination (partner network)
3. Risk-aware filtering (we decline toxic cases)
4. Cost + Fee transparency (no hidden markups)
5. Real substance (not virtual office theater)
6. Single point of coordination (one PM, one timeline)

6.7 Common Scenarios (links to spokes)

Relocating from the UK after non-dom changes? [See how Banking-First applies to UK restructuring →]

Managing German exit tax obligations? [See the UAE exit-tax coordination process →]

Investing in UAE property for Golden Visa? [See the integrated investment + structure package →]

6.8 FAQ

Key questions:

- "I already have a tax advisor. Do I need your partner firm?" – Not necessarily. We coordinate with your existing advisor.
- "What countries do your partner firms cover?" – UK, Germany, Netherlands. Other jurisdictions: we connect you with vetted firms or coordinate with your advisor.
- "Who manages the process?" – WTP is single point of coordination.
- "Can you guarantee the bank account?" – No one can. We guarantee we won't start until we've assessed bankability.
- "I'm from a country not listed. Can you help?" – If your profile passes our pre-check, yes.
- "I already have a UAE company but the bank rejected me." – Compliance Rescue is a core service.
- "Do I need to physically move?" – Depends on substance requirements for tax residency.

6.9 Final CTA

Your UAE structure is only as good as your bank account.

Get a Banking Roadmap – a personalized assessment of your bankability, recommended structure, and step-by-step timeline.

Free. 5-7 business days. No commitment.

[Get Your Banking Roadmap]

Spoke Pages (Tier 1 triggers)

Each spoke page follows the same structure but with jurisdiction-specific:

- Hero with specific regulatory trigger
- Exit-side specifics (e.g., UK non-dom rules, German 7-year installment plan, NL Box 3 thresholds)
- Timeline aligned to that country's tax calendar
- Partner firm mention for that specific market
- Same CTA: Get Your Banking Roadmap

7. PDF Presentation (10 slides)

For partners to share with end clients. Branded, clinical, Quiet Luxury aesthetic.

1. **Cover:** "Building Bankable UAE Structures" + WTP logo
2. **The Problem:** "Two sides, one gap" – nobody coordinates exit + entry
3. **Two Sides, One Process:** Visual schema Exit <-- Bridge --> Entry with partner firms
4. **Why UAE:** Jurisdiction comparison table (5 jurisdictions, hard data)
5. **Banking-First Method:** 4-step visual flow
6. **What You Get:** Deliverables per package (Architecture / Full Setup / Retainer)
7. **How We're Different:** 6 differentiators (one per icon)
8. **Risk Policy:** Green/Yellow/Red verdict system + stop-factors
9. **For Partners:** Partner protection framework + network benefits
10. **Next Step:** "Get Your Banking Roadmap" + contact

8. Content Pillars & Funnel

5 Content Pillars

PILLAR	% OF CONTENT	TYPE	GOAL
Jurisdiction intelligence	35%	Searchable	SEO capture: "UK non-dom UAE", "German exit tax UAE"
Banking & compliance	25%	Searchable	SEO: "UAE bank account rejection", "DIFC vs mainland"
Method & process	20%	Shareable	LinkedIn thought leadership, trust building
Case patterns	15%	Shareable	"Client from UK restructured in 6 weeks" (anonymized)
Market updates	5%	Timely	Regulatory changes, new bank policies

Buyer Journey

STAGE	CONTENT	CHANNEL	CTA
Awareness	"UK Non-Dom Abolished: Your Options" articles	SEO, LinkedIn	Read more
Consideration	Jurisdiction comparison, Banking-First explainer	Hub page, LinkedIn	Download guide
Decision	Hub + spoke landing pages	Paid ads, SEO	Get Banking Roadmap
Nurture	Email sequence (5 emails, 14 days)	Email	Book diagnostic call

STAGE	CONTENT	CHANNEL	CTA
Engagement	Diagnostic call → Pre-check → Full engagement	Sales	Sign agreement

9. Technical Implementation

Multi-Landing System

- New landing type: `VITE_LANDING=client`
- URL structure: `/relocate (hub)`, `/relocate/uk-non-dom`, etc.
- i18n keys prefix: `cl.*` (client landing)
- Language: English first, Russian later
- New CRM funnel in Bitrix24 for B2C leads

Design System

- Same Quiet Luxury aesthetic as partner landings
- Fonts: Playfair Display (headings) + Inter (body)
- Palette: `#1A2332` (dark), `#FAFAFA` (light), `#C5A572` (gold accent)
- New component: "The Bridge" map visualization
- New component: Problem cards grid
- New component: Jurisdiction comparison table

Compliance (pre-deploy checklist)

- Cookie consent (opt-in, Reject All = Accept All)
 - Privacy Policy page
 - WCAG 2.1 AA (Lighthouse ≥ 90)
 - GA4 conditional loading (only after consent)
 - No API keys in public code
-

10. Success Metrics

Leading Indicators (Month 1-3)

- Banking Roadmap requests per month
- Hub page → CTA click-through rate
- Spoke page traffic from SEO
- Time on page (hub and spokes)

Lagging Indicators (Month 3-6)

- Roadmap → Diagnostic call conversion rate
- Diagnostic → Paid engagement conversion rate

- Average deal value (B2C vs B2B comparison)
- Partner referral flywheel: B2C clients referred to partners

Target

- Month 3: 20+ Banking Roadmap requests/month
- Month 6: 5+ paid engagements from B2C channel
- Month 6: 3+ reverse referrals to B2B partners (flywheel evidence)

11. Risks & Mitigations

RISK	IMPACT	MITIGATION
Partner network not deep enough	Can't deliver on "exit co-ordination" promise	Honest language: "established relationships in UK/DE/NL, coordinate with your advisor elsewhere"
B2C cannibalizes B2B	Partners feel bypassed	Separate URLs, separate messaging, flywheel design (B2C feeds B2B)
Banking Roadmap overwhelming to deliver	Each one takes significant effort for free	Template + checklist approach; qualify via intake form
Low SEO traction	Spoke pages don't rank	Supplement with LinkedIn content + paid ads on high-intent keywords
Jurisdiction comparison outdated	Tax rates or rules change	Add "Last updated" dates, schedule quarterly review

12. Implementation Priority

1. **Hub page** (/relocate) – captures all markets
2. **UK spoke** (/relocate/uk-non-dom) – highest volume trigger
3. **PDF deck** – partners can start sharing immediately
4. **German spoke** (/relocate/german-exit-tax) – highest deal value
5. **Dutch spoke** (/relocate/dutch-box3) — completes Tier 1
6. **Email nurture sequence** (5 emails, 14 days)
7. **Content articles** (2-3 jurisdiction intelligence pieces)

Next step: Implementation plan via writing-plans skill.
