

"WTP — Project Summary"

What was built, what was delivered, and where things stand.

What is this project

WTP (Welcome to Paradise) is a B2B partner-facing website for a UAE execution partner. The site is designed for brokers, private bankers, advisors, family offices, and agencies outside the UAE who need a reliable on-the-ground operator in Dubai.

The website communicates the WTP value proposition: bankability, compliance, partner protection, and transparent delivery.

What was delivered

1. Landing page

A full B2B landing page with 8 content sections:

- **Hero** — value proposition and two CTAs (Partner Kit, Submit a Case)
- **Who it's for** — target audience description
- **Partner Benefits** — ownership protection, transparency, control, quality
- **Delivery Process** — 4-step flow: Pre-screen → Banking Scenario → Delivery → Ongoing
- **Engagement Models** — Referral and White-label options with partner protection policy
- **Risk Policy** — Green (accept), Yellow (conditions), Red (decline) classification
- **Product Line** — 8 service categories with descriptions and links to detail pages
- **CTA** — pilot case invitation

The page is fully bilingual (English and Russian) with a language toggle in the navigation.

2. Product pages (8)

Each service category has its own detail page with:

- Service description and positioning
- List of specific services included (5-6 per category)
- Red flags (cases we decline)
- Expected result for the client
- Call-to-action block

The 8 categories:

CATEGORY	FOCUS
Corporate Banking	Account opening, payment infrastructure, compliance

CATEGORY	FOCUS
Premium Banking	Personal accounts, private banking, investment access
Company Formation	Free zone, mainland, licensing, structuring
Visa & Residency	Work visas, investor visas, Golden Visa, Emirates ID
Tax Residency	Tax certificates, substance, double tax treaties
Accounting	Bookkeeping, VAT, corporate tax, audit, payroll
Real Estate	Residential, commercial, Golden Visa properties
Wealth & Protection	Wills, foundations, family office, custody

3. Lead capture forms

Two forms that create leads directly in Bitrix24 CRM:

- **Submit a Case** — 8-field KYC intake form (name, email, company, jurisdiction, service, budget, timeline, description)
- **Contact** — 4-field general inquiry form

4. Documentation package (20 documents)

A complete Month 1 documentation suite, all available in English and Russian:

Basics (3): Glossary, Tone of Voice Guide, Rejection Templates **Process (6):** Process Map, Intake Checklist, Package Tiers, Commercial Proposal Template, Retainer Sheet, Risk Policy **Partner (5):** One-Pager, First Touch Email, Follow-Up Email, Pilot Request Email, Weekly Report Template **LinkedIn (4):** 2 Pinned Posts, 4 Monthly Posts, Flagship Case Draft **Strategy (1):** 6-Month Marketing Plan with monthly themes and KPIs **Process (1):** This project summary and technical handover

All documents are uploaded to the Notion workspace for easy access and collaboration.

5. Responsive design

The site works across three device sizes:

- Desktop (full layouts)
- Tablet (≤900px, 2-column)
- Mobile (≤480px, single column with hamburger menu)

6. SEO basics

Open Graph tags, Twitter Cards, and meta descriptions for proper link previews when sharing on social media and messaging apps.

Brand and design

- **Logo:** WTP wordmark ("Welcome to Paradise"), elegant serif style, displayed prominently in navigation and footer
- **Typography:** Playfair Display (headings) + Inter (body text), both with Cyrillic support
- **Product cards:** Gallery-style layout with gradient accent backgrounds and hover animations
- **Overall feel:** Professional luxury — clean, minimal, confidence-building

Where things are hosted

- **Website:** GitHub Pages (ready for deployment)
 - **CRM:** Bitrix24 (forms submit leads automatically)
 - **Documents:** Notion workspace (all 20 documents, bilingual)
 - **Source code:** Local repository, ready for GitHub push
-

Current status

Everything listed above is built, tested, and working. The site builds without errors and is ready for deployment to GitHub Pages.

Pending: Final client review before pushing to GitHub.
