Production Notes

Shooting Tips:

1. **Lighting:** Natural light (near window) or ring light for talking head. Avoid harsh overhead lights.
1. **Audio:** CRITICAL. Use external mic (Rode VideoMicro or DJI Mic). Phone mic is NOT enough for credibility.
1. **Framing:** Talking head = centered or rule-of-thirds. Leave headroom. Eye level camera (not looking down at phone).
1. **B-roll:** Shoot 2-3x more than you need. 10 seconds of usable footage might require 30 seconds of shooting.
1. **Consistency:** Same background/location for talking head scenes = brand consistency.

Editing Tips:

1. **Subtitles:** MANDATORY. 85% of Instagram videos watched without sound. Use CapCut auto-captions, then manually fix errors.
1. **Pacing:** Cut every 3-5 seconds. Static shots lose attention. Jump cuts are fine (expected in Reels).
1. **Music:** Use Instagram music library (for Instagram) or Epidemic Sound (for cross-platform). Keep volume at 20-30% (voiceover should dominate).
1. **Text overlays:** Bold sans-serif fonts (Montserrat, Poppins). High contrast (white text on dark background or vice versa). Readable on mobile.
1. **Hook:** First 3 seconds MUST grab attention. If text hook isn't compelling, no one watches past it.

Posting Strategy:

- **Best times to post (UAE timezone, GMT+4):**
- Morning: 7-9 AM (people commuting, checking phones) - Lunch: 12-2 PM (lunch break scroll) - Evening: 6-9 PM (after work, peak scroll time)
- **Frequency:** 3-4 Reels/week = Mon/Wed/Fri + optional Sat or Sun
- **Hashtags:** 5 per post. Always lead with #BankingFirstMethod (branded). Add 4 topic-specific tags. Rotate topic tags between posts. Quality over quantity — fewer, more relevant hashtags outperform hashtag stuffing.
- **First comment:** Post CTA link in first comment immediately after publishing (Instagram doesn't allow clickable links in captions, but first comment gets visibility).
- **Engagement:** Respond to ALL comments within first 2 hours (boosts algorithm). Ask a question in caption to encourage comments.
- **Save-bait:** Add "Save this for when you're ready to buy" or "Bookmark this checklist" in caption. Saves = strongest algorithm signal in 2026 (LinkedIn and Instagram both).

Content Repurposing:

Each Reel can be repurposed:

1. **Instagram Reel** (primary)
2. **Instagram Story** (repost Reel to Story 24 hours later)
3. **LinkedIn video post** (native upload, not link — higher reach)
4. **YouTube Shorts** (vertical format, same content)
5. **TikTok** (if expanding to TikTok later)

One shoot = 5 distribution channels.

Next Steps

1. **Choose 3 scripts to shoot first** (recommend: PS-1, ED-1, MD-1 for variety)
2. **Prepare shot list** for each (write down every camera angle needed)
3. **Book 2-hour shooting block** (batch-shoot all 3 Reels in one session)
4. **Edit within 24 hours** while memory is fresh
5. **Schedule posts** using Buffer, Later, or native Instagram scheduling
6. **Track performance** in Instagram Insights (views, saves, shares, profile visits)
7. **Iterate based on data** (double down on formats with highest saves/shares)
