

# webinar-template

Complete webinar system for UK/DE/NL tax advisors, wealth managers, and family offices

Turn partners into RE referral sources through education, not pitch

**Target Audience:** B2B partners (tax advisors, wealth managers, FO, immigration consultants) **Format:** 45-min online webinar, educational focus, pilot case CTA **Frequency:** Monthly (4 webinars = 4 themes on rotation) **Platform:** Zoom Webinar (up to 100 participants, \$79/mo) or Google Meet (free, up to 100)

## Webinar Series Overview

### Why Webinars for Partners?

Partners need to understand:

1. **How Dubai RE works** — to confidently discuss with clients
2. **What problems to watch for** — banking, structure, tax implications
3. **How to work with WTP** — referral process, fee structure, pilot case model

Webinars = scalable education. One webinar reaches 20-30 partners across UK/DE/NL simultaneously. Recording becomes evergreen content (YouTube, website, email).

### Series Structure (4 Core Topics)

## Full Script (Time-Coded)

### 0:00-5:00 — Introduction + Context

#### Slide 1: Title Slide

- "Dubai Real Estate for UK Non-Doms: What Tax Advisors Need to Know"
- Presenter name, WTP logo
- Date

#### Script:

"Good afternoon, everyone. Thank you for joining.

I'm [Name], [Title] at WTP. We work with UK tax advisors and wealth managers whose clients are relocating to Dubai — specifically around real estate, banking, and visa setup.

Today's topic: Dubai real estate in the context of UK non-dom changes. If you have clients asking about UAE property — or thinking about relocation — this session will give you the framework to advise them properly.

#### What we'll cover in the next 40 minutes:

1. What changed with UK non-dom rules — quick recap
2. How UAE real estate fits into relocation strategy
3. The 3 structural questions every UK advisor should ask clients BEFORE property purchase
4. Banking pitfalls (the #1 issue we see)
5. How to work with us — pilot case model

No sales pitch. This is education. At the end, if you have a client who fits — we'll offer to take one pilot case free of charge to test the partnership.  
Let's start."

---

### 5:00-15:00 — UK Non-Dom Changes & UAE Impact

#### Slide 2: UK Non-Dom Changes 2025 — Recap

- Headline: "What Changed for Your Clients"
- Bullet list:

- Non-dom regime abolished (April 2025) - 4-year FIG regime (limited relief) - Worldwide taxation after 4 years - Exit implications: deemed disposal, inheritance tax on worldwide assets **Script:**

"Quick context — most of you know this, but let's align.

April 2025: UK abolished the non-dom regime. Replaced with 4-year Foreign Income & Gains relief — limited, not permanent.

What this means for your HNWI clients:

- If they've been in the UK 4+ years → worldwide income and gains now taxable
- If they stay → inheritance tax on worldwide assets (not just UK)
- Exit option: leave UK, establish tax residency elsewhere

**And that's where UAE comes in.**

[Next slide]

---

#### Slide 3: Why UAE for UK Relocators

- Map: UK → UAE flight path (7 hours)
- Stats:

- 0% personal income tax - 0% capital gains tax - 0% inheritance tax - Golden Visa (2M AED property = 10-year residency) - No minimum stay requirement (UAE tax residency ≠ 183 days) **Script:**

"UAE offers what UK no longer does: zero tax on income, gains, and inheritance.

For your clients who've decided to leave — UAE is the top destination.

Why?

- Tax: zero on everything
- Visa: buy 2M AED property (roughly £420K) → 10-year Golden Visa
- Flexibility: no 183-day requirement — UAE tax residency can be obtained with 90 days + economic ties

But — and this is critical — property alone doesn't solve the problem. Your clients need structure.

[Next slide]

---

#### Slide 4: Common Misconception

- Big red X over: "Buy property in Dubai → Tax residency solved"
- Correct formula:

- Property + Company + Bank Account + 90 Days + Tax Residency Certificate = Tax Exit **Script:**

"Here's where most UK clients — and some advisors — get it wrong.

They think: 'Buy a flat in Dubai → Golden Visa → tax residency → done.'

**That's not how it works.**

UAE tax residency requires:

1. Valid residency visa (Golden Visa via property qualifies)
2. Physical presence (90+ days or substantial economic ties)
3. UAE-based company or employment (for economic substance)
4. UAE bank account (active, not dormant)
5. Tax Residency Certificate from UAE tax authority

Property is ONE input. Not the whole equation.

If your client buys property but doesn't set up the rest — they'll have a visa, but NOT tax residency. And UK HMRC will challenge their exit.

**This is where we come in."**

---

#### 15:00-25:00 — 3 Structural Questions

##### Slide 5: The 3 Questions Every Tax Advisor Should Ask

- Numbered list:

1. Personal or company ownership? 2. Can they open a UAE bank account? 3. What's their UK exit tax liability? **Script:**

"Before your client even looks at properties — answer these three questions. They'll save you both headaches.

[Next slide for each question]

---

Slide 6: Question 1 — Personal or Company Ownership?

- Table: Personal vs. Company comparison

| FACTOR                   | PERSONAL OWNERSHIP         | COMPANY OWNERSHIP                         |
|--------------------------|----------------------------|-------------------------------------------|
| Golden Visa              | ✔ Eligible (2M+ AED)       | ✘ Not eligible (company-owned ≠ personal) |
| Tax efficiency (UK exit) | Depends on deemed disposal | Can structure for lower exit tax          |
| IHT protection           | Limited                    | Stronger (non-UK structure)               |
| Mortgage availability    | Easier                     | Limited                                   |
| Flexibility              | Lower                      | Higher (sell shares, not property)        |

Script:

"First question: should the property be in their personal name or a company?"

Personal ownership:

- Pros: Golden Visa eligible, easier mortgage
- Cons: Less tax flexibility on UK exit, IHT exposure

Company ownership (UAE or offshore LLC):

- Pros: Better UK exit tax structuring, IHT mitigation, flexibility
- Cons: No Golden Visa from company-owned property, harder financing

Our default for UK clients:

- If Golden Visa is critical → personal ownership + separate UAE company for substance
- If tax structuring is critical → company ownership + alternative visa route (investor visa via company)

You as the tax advisor decide. We execute.

[Next slide]

Slide 7: Question 2 — Can They Open a UAE Bank Account?

- Headline: "40% of property buyers face banking rejection"
- Icon: Bank building with red X

Script:

"Second question — and this is the one that kills deals.

Can your client open a UAE bank account?

Why it matters:

- UAE mortgage requires local bank account
- Tax residency requires economic substance (active account, transactions)
- Golden Visa application often requires proof of UAE banking relationship

Reality check:

- 40% of foreign property buyers struggle to open accounts
- Why? Source of funds, KYC compliance, perceived risk (crypto, offshore structures)

What we do: We run a free banking pre-screen BEFORE property search.

Submit client profile + SOF documentation → we tell you within 5-7 days: 'Yes, bankable' or 'No, structure issues to fix first.'

We don't waste time showing properties to clients who can't bank. That's the WTP difference.

[Next slide]

### Slide 8: Question 3 — UK Exit Tax Liability

- Headline: "Exit Tax Isn't Eliminated — It's Triggered Early"
- Diagram: UK Exit → Deemed Disposal → CGT + Inheritance Tax Start

#### Script:

"Third question: what's their UK exit tax liability?"

Leaving the UK doesn't erase tax — it accelerates it.

#### Deemed disposal:

- Certain assets treated as sold when you leave
- Capital gains tax triggered on exit (not when actually sold)
- Can be 10-28% depending on asset type

#### Inheritance tax:

- UK assets remain in IHT scope for 3-5 years after exit (depending on domicile status)
- Worldwide assets may still be caught if domicile not properly broken

**Your role as tax advisor:** Calculate exit liability, plan timing, structure assets pre-exit. **Our role:** Execute the UAE side — company, visa, property, banking — so your client has clean UAE tax residency when they exit UK. **This is a partnership.** You handle UK exit. We handle UAE entry.

### 25:00-35:00 — Banking Pitfalls & WTP Process

#### Slide 9: Banking Pitfalls (Real Examples)

- Case 1: "Crypto entrepreneur — 3 banks rejected him"
- Case 2: "Offshore trust structure — 6-month delay"
- Case 3: "Bought property, couldn't get mortgage — lost deposit"

#### Script:

"Let's talk about the banking nightmare — real examples, anonymized."

#### Case 1: Crypto Entrepreneur

- UK client, sold crypto portfolio, £5M cash, clean taxes
- Applied to 3 UAE banks → all rejected
- Why? Source of funds = crypto (red flag for UAE banks, AML concerns)
- Solution: We restructured — mixed asset portfolio, slower deployment, bank accepted

#### Case 2: Offshore Trust

- Client held assets in Jersey trust
- UAE banks: 'We don't bank trust structures' → 6-month delay
- Solution: Beneficiary distribution to personal account, THEN property purchase

#### Case 3: Deposit Lost

- Client bought off-plan, paid 10% deposit (£200K)
- Applied for mortgage → bank rejected due to incomplete KYC
- Developer kept deposit (per contract)
- Loss: £200K

**Lesson:** Banking FIRST. Property SECOND.

### Slide 10: WTP Process — Banking-First Model

- Process flowchart:

1. Client Profile + SOF → Pre-Screen (5-7 days) 2. Structure Recommendation (personal/company, visa route) 3. Bank Account Opening (2-4 weeks) 4. Property Search (after banking confirmed) 5. SPA + Mortgage (simultaneous) 6. Visa Application (Golden or Investor) 7. Tax Residency Certificate (after 90 days or economic ties met) **Script:**

"Here's how we work — and why it prevents the disasters on the previous slide.

#### Step 1: Pre-Screen

- You send client profile + SOF docs
- We assess: 'Can UAE banks accept this client?'
- Answer within 5-7 days: Yes/No/Yes with adjustments

#### Step 2: Structure Recommendation

- Based on your tax advice + our UAE expertise
- Personal or company ownership
- Visa route: Golden vs. Investor

#### Step 3: Banking

- We open UAE bank account BEFORE property search
- Client has confirmed banking before signing SPA

#### Steps 4-7: Execution

- Property search, purchase, visa, tax residency
- You stay involved for UK exit coordination

**Key point:** No property search until banking is confirmed. That's the WTP model."

### 35:00-45:00 — Case Study + Q&A

#### Slide 11: Case Study — UK Tax Advisor Partnership

- "How [Advisor Name/Firm] Sent 3 Clients in 6 Months"
- Timeline:

- Month 1: First pilot case (successful) - Month 2-3: Two more referrals - Month 6: £18K in referral fees earned - Client satisfaction: 3/3 clients completed full relocation **Script:**

"Let me share a real partnership example — anonymized.

**Background:** UK tax advisor with 8-10 HNWI clients affected by non-dom changes. Referred first client to us as pilot case. **Client 1 (Pilot):**

- £3M property budget, needed Golden Visa + tax residency
- Pre-screen: approved
- Structure: personal ownership + UAE company for substance
- Timeline: 8 weeks (bank account → property → visa → TRC)
- Advisor earned £9K referral fee

**Client 2-3:** Same advisor referred two more clients (smaller budgets, £1.5M and £2M). **Result:**

- 3 successful relocations
- £18K total referral fees for advisor (6 months)
- All 3 clients now have UAE tax residency + Golden Visas
- Advisor now has 4 more clients in pipeline

**Lesson:** One successful pilot case builds trust. Partnership compounds.

[Next slide]

#### Slide 12: Q&A + Pilot Case Offer

- "Questions?"
- Offer box:

- "Submit 1 Pilot Case — Free Structure Assessment" - No fee for first case assessment - If successful → referral agreement for future cases **Script:**

"Let's open the floor for questions.

Before we jump in — here's our offer to this group:

**Free Pilot Case:** If you have one client who fits this profile (UK relocators, RE interest, 2M+ AED budget), submit them as a pilot case. We'll do:

- Free banking pre-screen
- Free structure assessment
- Full transparency on process, timeline, fees

If it works — we formalize a referral agreement. If not — no cost, no obligation.

**Goal:** You see how we work. We prove we're a reliable partner.

Now — questions?"

---

**[Q&A — 10 minutes] Live Engagement Tactics (use throughout webinar):**

- **Poll 1 (at 5:00):** "How many of your clients have asked about UAE property in the last 6 months?" → 0 / 1-3 / 4-10 / 10+
- **Poll 2 (at 15:00):** "Which is the biggest concern for your clients?" → Banking / Tax structure / Golden Visa / All three
- **Chat prompt (at 25:00):** "Type your country in the chat — I'll address region-specific questions"
- **Q&A panel open throughout** — address 2-3 questions inline during content (breaks monotony)

These polls serve two purposes: (1) keep audience engaged (2) give you data for follow-up segmentation.

Common questions to prep:

1. "What's your referral fee structure?" → 20-35% of WTP commission, depending on service package
  2. "How long does full process take?" → 6-12 weeks depending on banking complexity
  3. "Can clients visit Dubai first?" → Yes, recommended — viewing trip = 3-4 days
  4. "What if client's SOF is complex?" → Pre-screen identifies issues early, we advise on restructuring
  5. "Do you handle UK-side tax filings?" → No, we coordinate with you (the UK advisor) but don't file UK taxes
- 

### Slide 13: Next Steps

- "How to Submit a Pilot Case"
- Email: [email]
- WhatsApp: [number]
- Include: Client brief (budget, situation, timeline) + SOF summary

### Script:

"Thank you all for joining.

### Next steps:

1. If you have a client — email or WhatsApp me their brief
2. We'll schedule a 15-min call to discuss their situation
3. Pilot case process starts

**Recording:** You'll receive this webinar recording + slides within 24 hours. **Follow-up:** I'll send a summary email tomorrow with key takeaways + pilot case submission form.

Any final questions? Otherwise, thank you — looking forward to working with some of you."

## Post-Webinar LinkedIn Content

### Post 1: Day After Webinar

"Hosted a webinar yesterday for UK tax advisors: 'Dubai Real Estate for Non-Doms.'

3 things that surprised attendees:

1. Property alone ≠ tax residency. You need: company + bank account + 90 days + TRC. Most agents skip this.
1. 40% of UK buyers face banking rejection AFTER purchasing property. Pre-screening takes 5-7 days and costs nothing.
1. Personal vs. company ownership isn't a simple choice — it depends on Golden Visa priority, exit tax, and IHT exposure.

Recording available for tax advisors and wealth managers — DM me.

Next session: 'Golden Visa 2026: Complete Guide for Wealth Managers' — [date]. Link in comments.

### Post 2: Week After Webinar (Key Insight Clip)

"One question from last week's webinar keeps coming back:

'My client already bought the apartment. Can you still help with banking?'

Short answer: yes, but it's harder. And more expensive. And slower.

The banking-first model means we check feasibility BEFORE the SPA is signed. Not after.

40% of foreign buyers discover banking issues post-purchase. Half of them could have been prevented with a 5-day pre-screen.

If you advise UK clients on UAE property — the order matters: bank first, buy second.

## Recording Uses (Maximize ROI)

1. **YouTube** — Unlisted link for attendees, or public for SEO
2. **Website** — Embed on Partners page or Resources section
3. **Email nurture** — Send to partner prospects who didn't attend

4. **LinkedIn content** — Clip 5 key moments (60-90 sec each) → native video posts
5. **Sales asset** — Send recording to partners: "Here's how we work"
6. **Onboarding** — New partners watch recording as training

**One webinar = 10+ content pieces.** Record, clip, repurpose.

## Tips for Success

### DO:

✅ Start on time (respect attendees' calendars) ✅ Use real case examples (anonymized but detailed) ✅ Encourage questions throughout (not just at end) ✅ Offer something valuable for free (pilot case, guide, report) ✅ Follow up within 24 hours (while memory is fresh) ✅ Repurpose recording into clips for social media

### DON'T:

❌ Run over time (45 min max — people drop off after) ❌ Pitch hard (education first, partnership offer second) ❌ Ignore chat/Q&A (assign someone to monitor) ❌ Use jargon without explanation (audience may be new to UAE) ❌ Skip follow-up (80% of value is in follow-up nurture) ❌ Forget to record (recording = evergreen asset)

## Next Webinar: Iteration Plan

After first webinar, review:

1. **Which topics got most questions?** → Expand those in next webinar
2. **Drop-off point** — When did attendance decline? → Shorten or rearrange
3. **Pilot case submissions** — If <3, adjust CTA or offer
4. **Recording views** — Are people watching? If not, improve thumbnail + title
5. **Partner feedback** — Email 5-10 attendees: "What would make this more useful?"

**Improve every webinar.** By webinar #4, you'll have a dialed-in system.
