Channel Scores

CHANNEL	SCORE	DOCS	KEY STRENGTH	CRITICAL GAP
Partners	8.5/10	4	Banking-First hook, Pratfall Effect, transparent commissions	Timeline discrepancy (48h vs 5-7 days between One-Pager and Service Map)
LinkedIn	8/10	3	Branded frameworks (#BankingFirstMethod), strong hooks, consistent voice	33% of posts lack banking angle; personal vs company brand unresolved
Instagram/YouTube	8/10	3	Production-ready scripts, Banking-First in every Reel	No paid amplification, no geo-targeting for EU audience
Google Ads	8.5/10	3	Unique Campaign 2 (banking intent niche), dynamic LP headlines	LAUNCH BLOCKER: ad descriptions >90 chars; missing blog pages for Campaigns 2-3
Portal Listings	8/10	2	8 templates covering full segment range, Words to Use/Avoid	No portal algorithm optimization guide, no CMS field mapping
Events	8/10	3	Investor dinner (9/10), full webinar script, competitor intelligence	No CRM pipeline, DE/NL webinar scripts not ready

Overall Score: 8.2/10 — Strong strategic foundation. Banking-First consistently embedded. Ready for launch after critical fixes.

Cross-Channel Strengths

- Banking-First Positioning: 9/10** — Structural, not cosmetic. Every document builds around banking pre-screen as the core differentiator
- Production Readiness** — Most documents can be handed to execution teams as-is
- Strategy Alignment** — All channels map to the 4 audience tiers from the strategy
- Consistent Brand Voice** — Clinical, expert, restrained tone maintained across 18 documents

Cross-Channel Gaps (appearing in 3+ channels)

GAP	CHANNELS AFFECTED	IMPACT
No CRM pipeline (tool, fields, stages, automation)	Partners, Ads, Events, Portals	HIGH — leads decay without pipeline

GAP	CHANNELS AFFECTED	IMPACT
No partner testimonials / social proof	Partners, LinkedIn, Events	HIGH — trust gap in all B2B materials
DE/NL audience undertreated vs UK	LinkedIn, Events, Ads	MEDIUM — 40%+ of target market underserved
No lead capture funnel (link-in-bio → form → follow-up)	Social, LinkedIn, Events	HIGH — CTAs lead nowhere
Uncited statistics ("40% banking problems", "300+ cases")	Partners, Ads, Social	MEDIUM — credibility risk
Timeline discrepancy (48h vs 5-7 days)	Partners, Service Map	MEDIUM — undermines partner trust
No A/B testing framework	LinkedIn, Social, Ads, Events	MEDIUM — no optimization loop
No competitor analysis	Social, Portals, Ads	MEDIUM — differentiation claims untested

Top 5 Priority Fixes (Cross-Channel)

1. FIX GOOGLE ADS CHARACTER COUNTS (Launch Blocker)

Impact: CRITICAL — ads will be rejected at upload **Action:** Re-count every description across all 27 RSAs. Hard limit: 90 characters. Many currently at 120-150 chars. Also verify all headlines ≤30 chars. **Owner:** Ads team **Timeline:** Before any Google Ads launch

2. BUILD CRM PIPELINE (Foundation)

Impact: HIGH — without this, all channels generate leads that decay **Action:** Define: tool (Bitrix24 per strategy), pipeline stages (Contact → Qualified → Meeting → Pilot Case → Deal), required fields per contact (name, company, role, country, source channel, interest level, budget range), automation rules (source tagging, follow-up reminders) **Owner:** Operations **Timeline:** Month 1 (before paid channels launch)

3. CREATE LEAD CAPTURE FUNNEL (Conversion Infrastructure)

Impact: HIGH — all CTAs currently lead to incomplete paths **Action:** Build: (a) Link-in-bio landing page (3-5 links: Pre-Screen, Golden Visa Guide, RAK Report, Book Call, WhatsApp), (b) Pre-screen intake form (3 fields for launch: Name, Email, Phone), (c) Email nurture sequence (3 emails over 7 days), (d) WhatsApp auto-reply with pre-screen questionnaire, (e) UTM tracking for attribution **Owner:** Marketing + Dev **Timeline:** Month 1

4. ADD PROOF POINTS (Credibility)

Impact: MEDIUM-HIGH — assertions without evidence erode trust **Action:** (a) Source or soften "40% of buyers face banking problems" statistic, (b) Create 2-3 anonymized partner case studies ("UK tax advisor, 3 referrals in Q4, \$X earned"), (c) Verify "300+ cases" and "94% approval rate" with WTP operations, (d) Replace unverifiable numbers with softer language if needed **Owner:** Content + Operations **Timeline:** Before distributing partner materials

5. COMPLETE DE/NL CONTENT (Market Expansion)

Impact: MEDIUM-HIGH — unlocks 40%+ of target partner base **Action:** (a) Full webinar script for Germany Exit Tax (Wegzugsteuer), (b) New webinar for Netherlands Box 3, (c) German/Dutch language Google Ads variants (lower CPC opportunity), (d) DE/NL-specific LinkedIn posts (2-3 per month) **Owner:** Content **Timeline:** Month 2-3

Per-Channel Detailed Audit Summaries

Partners (8.5/10)

Docs reviewed: RE-One-Pager-EN.md, RE-One-Pager-RU.md, Golden-Visa-Quick-Guide.md, RE-Service-Map.md **Highlights:**

- One-Pager hook is textbook pain-point copywriting ("Client signed 3M AED. Bank declined account")
- "What We Won't Do" section = Pratfall Effect (admitting limitations builds trust)

- Referral Fee Schedule (20-35%) with industry comparison = Contrast Effect + Anchoring
- "Start With One Case" CTA = zero activation energy (Foot-in-the-Door)
- Golden Visa Guide Section 4 (tax by country) = crown jewel — speaks partner's language

Issues:

- Timeline: One-Pager says 48h, Service Map says 5-7 days — resolve before distribution
- No partner testimonials in any document
- Golden Visa "Quick Guide" is 234 lines — not quick. Rename or create actual 2-pager
- Service Map reads like internal SOP, not partner-facing document
- Missing: visual service map flowchart, referral agreement template, FAQ document

LinkedIn (8/10)

Docs reviewed: 4-week-content-plan.md, post-drafts.md, newsletter-template.md Highlights:

- Branded frameworks (#BankingFirstMethod, 3-Question Filter) are strong IP
- Hook quality excellent across all 12 posts
- Content funnel balanced: 25% awareness / 55% education / 20% conversion
- Newsletter WTP Take section with internal data (12 pre-screens, 33% failure) = insider value

Issues:

- 4/12 core posts (33%) have no banking angle — Banking-First should be the lens for ALL content
- Personal brand (Konstantin PMM Consulting) vs WTP RE content = identity conflict on LinkedIn
- Newsletter positioned as market intelligence, not banking-informed intelligence
- Zero video content in plan
- No competitor content analysis / outlier research done
- No engagement target list (who are the 5-10 profiles to comment on?)

Instagram/YouTube (8/10)

Docs reviewed: content-plan-month1.md, reel-scripts.md, youtube-scripts.md Highlights:

- Reel scripts are production-ready with scene-by-scene direction
- YouTube scripts are broadcast-quality with B-roll inserts and timing markers
- Banking-First woven into every script without feeling forced
- Cross-platform repurposing flow well-diagrammed

Issues:

- No paid amplification — new account organic reach is near-zero. Need \$200-500/mo for Reel boosts
- No geo-targeting for EU audience (posting times UAE-optimized, target is UK/DE/NL)
- Hashtags are all high-competition (#DubaiRealEstate 1M+ posts). Need mid-tail rotation
- No YouTube Shorts strategy (fastest growth lever for new channels)
- No lead capture funnel spec (all CTAs = "link in bio" but no funnel defined)
- Video 1 at 15 min is too long for <1,000 subscriber channel (optimal: 8-12 min)

Google Ads (8.5/10)

Docs reviewed: campaign-setup.md, ad-copy-library.md, landing-page-spec.md Highlights:

- Campaign 2 (banking/structure intent) = unique niche no competitor bids on
- 27 RSAs + 5 banner designs + 2 YouTube scripts = complete creative library
- Dynamic headline matching by utm_campaign on LP = 30-50% conversion lift potential
- Comparison table ("8,000 Agents — What Makes WTP Different?") = strongest LP element
- Progressive budget rollout recommended (don't launch all 4 campaigns at once)

Issues:

- **CRITICAL:** Many descriptions exceed 90-char limit (up to 147 chars). Ads WILL be rejected.

- 6 form fields = too many for cold Google Ads traffic. Start with 3, add qualification in follow-up
- \$1,600-2,500/month across 4 campaigns / 9 ad groups is too thin. Focus: Campaign 1+2 only for months 1-3
- Blog pages referenced but not created (4 articles needed before Campaigns 2-3 launch)
- Google Optimize referenced but deprecated (use VWO/Optimizely)
- No Thank You page spec (conversion tracking, next steps)

Portal Listings (8/10)

Docs reviewed: listing-templates.md, agent-profiles.md **Highlights:**

- 8 listing templates covering full segment range (Golden Visa, luxury, villa, off-plan, RAK, Expo City, commercial, ultra-luxury)
- Banking pre-screen is FIRST advisory item in every template
- Words to Use / Words to Avoid list = brand voice enforcement
- Corporate Integration Specialist profile template = unique in market

Issues:

- Portal SEO guidance is surface-level (4 lines). Need: algorithm ranking factors, field mapping, refresh cadence
- No Bayut/PF CMS field mapping tables (great copy + empty fields = invisible in filtered searches)
- No lead-to-Service-Map handoff protocol (what happens after portal inquiry?)
- No competitor listing analysis
- No multilingual listing strategy (Russian/Arabic variants needed)

Events (8/10)

Docs reviewed: investor-dinner-pack.md, webinar-template.md, conference-checklist.md **Highlights:**

- Investor dinner pack = 9/10. Banking-First is the structural climax (Slides 8-9)
- "This is NOT a sales pitch" framing = Pratfall + Reciprocity + Contrast
- Webinar #1 (UK Non-Doms) has full production-ready script, time-coded
- "Pilot case" CTA = perfect B2B conversion chain (Foot-in-the-Door → Commitment)
- Competitor intelligence section in conference checklist = unique

Issues:

- No digital lead capture at events (QR code, iPad form). Only business cards
- Webinars #2-4 are outlines, not full scripts (3/4 not production-ready)
- No NL webinar at all despite Netherlands being Tier 2 target
- Elevator pitch leads with company intro, not Banking-First hook
- No CRM integration guidance in any document
- Roadshow frequency too aggressive (16 trips/year; start with London only)

Methodology

- 7 parallel mesh agents using Antigravity OS mesh-agents skill
- Each agent loaded role-specific skills (copywriting, marketing-psychology, paid-ads, page-cro, seo-audit, etc.)
- Strategy baseline: 1,057-line RE Marketing Strategy document
- Scoring: per-document + per-channel + weighted cross-channel
- All agents completed within ~5 minutes (parallel execution)
